An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Laura Johnson on February 3, 2004.

The application has been amended as follows:

In claim 60, line 1, the dependency has been changed from "59" to ~~59~~ 38 --.

In claim 61, line 1, the dependency has been changed from "59" to ~~59~~ 38 --.

In claim 74, line 1, the dependency has been changed from "73" to ~~73~~ 34 --.

In claim 75, line 1, the dependency has been changed from "73" to ~~73~~ 34 --.

These claims were amended in that claims 60 and 61 contradicted claim 59 and claims 74 and 75 contradicted claim 73 as follows: Claims 59 and 73 recite explanting the device after 90 days. Claims 60, 61, 74, and 75 all recite explanting the device after a longer period of time than 90 days,. However, if the device is already explanted at 90 days, it cannot be removed at 150 or 360 days, as it is already out of the body.

The examiner and Laura Johnson also discussed the support for claims 59-61 and 73-75, as nowhere in the specification does it state explicitly that the device is explanted after 90, 150, or 360 days. However, the specification does state on page 5, lines 23-28 that the device measures glucose accurately for 90,

150, or 360 days. Then on page 37, lines 21+, it states that the devices were explanted when they no longer were accurate. Putting the two statements together it is the examiner's position that there is support for the limitations of claims 59-61 and 73-75.

The examiner further notes that presence of patent 6,011,984 to Van Antwerp et al. The device is an implantable glucose sensor with a layer to promote ingrowth of tissue. This reference is, however, duplicative of Piccha, which also teaches such a layer. Neither reference teaches both a layer to promote tissue ingrowth and a capsular attachment layer, as recited in claim 34, or a layer to promote ingrowth and a vascular promotion layer, as recited in claim 38. Hence, the claims are allowable.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert L. Nasser whose telephone number is (703) 308-3251. The examiner can normally be reached on Mon-Fri, variable hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (703) 308-3130. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
